Subject: FW: public inquiry re: West Lake

Below is one of two inquiries received recently from the R7ActionLine. I created a file on the H drive, West Lake Schedule Tracker, Community-MCE-EJ correspondence etc folder, titled "Draft response to two R7ActionLine comments Oct13.doc" that contains proposed responses. The second response is identical to one of the responses I proposed to the recent MCE letter which asked the same question.

Please review.

COMMENTS OF REQUESTER

October 16, 2013

Dear Region 7: Missouri's DHSS radiologic epidemiologist, Mr. Keith Henke (Keith.Henke@health.mo.gov) has stated in a conversation about elevated gamma readings around West Lake, highest levels in the 60s and 70s recently, that the Superfund site needs "a better long-term gamma monitoring system" and suggested that Missouri's DNR order this to replace the AreaRAE system currently at the landfill. What will the EPA do to monitor for all forms of radiation while the fire breach pit is being dug and filled? Will you protect the area workers and residents from contamination by: 1) Ordering an appropriate gamma air monitoring system. 2) Ordering the Shelter to contain emissions during fire trench work.

As a 2nd point, neither Debbie Kring nor Hattie Thomas have responded to my calls to speak about West Lake, nor Ms. Kring to several emails directed at EPA outreach to the community. Is this not a violation of EPA rules and the spirit of the ROD process. Thank you.
